

# Youth Drug Prevention and Education

*Classes are held on various days and times based on the needs of current clients. Please be sure to call ahead to register. Walk-ins are **NOT** allowed. An assessment from us or formal referral from another therapist is required.*

Rob Castillo, LCSW, CAADC, MISA II and his associates have developed a youth education drug prevention course. The aim of this course is to help educate, familiarize and reinforce maintaining abstinence from drugs and alcohol. This course will inform participants on the various drug classifications, associated risks and repercussions from making poor choices. The short term and long-term damaging effects that drugs have on the brain will also be reviewed. Refusal skills will be explored. At the end of the program participants will be quizzed on the knowledge gained from the program. A letter and/or certificate of completion will be provided to participants upon **successfully** completing set criteria.

{ Recommended for both girls and boys, ages 13 to 18. Please note this may be a co-ed class }
